**HK Express Retains #1 On-Time Position in Hong Kong
Airline Continues Robust Growth in Guest Numbers**

Hong Kong, 19 August 2015 HK Express is flying high with outstanding monthly and yearly growth in Guest numbers and an on-time performance that other airlines can only dream of.

The airline has flown over 1.8 million Guests in the last 12 months, representing almost 100% growth over the previous 12 months. Over 190,000 Guests flew with HK Express in July alone, up 92% on last year.

Critically, HK Express has achieved this stellar growth sustainably while keeping operational excellence at the forefront of its business. According to independent flight data and statistics company FlightStats (www.flightstats.com), HK Express on-time performance (OTP) for July was at 72.5%, beating all other Hong Kong-based airlines once again. In fact, HK Express has delivered an average 82.9% on-time performance for the last 12 months.

Andrew Cowen, CEO of HK Express said, "We're very proud of our operational teams which have managed our tremendous growth in business and profitability without sacrificing delivery of the highest safety standard. Our consistently strong performance in getting Guests to their destinations on-time reflects the passion that we have for guest service and safe, low-fare air travel."

"I'm particularly happy with the achievement of these growth rates and performance results despite the challenging operating environment that comes with summer time weather conditions. While we were impacted by MERS, our strategy of route expansion and diversification resulted in very little impact on our growth for the July peak, although we are delighted to now be working towards full resumption of our South Korean routes," said Cowen.
